

DID GOD STRETCH OUT THE HEAVENS
OR
WAS THERE A BIG BANG?

THE BIG BANG THEORY

About fifteen billion years ago a kernel of mass energy exploded and began to spread outward. It began to cool and took on the form of hydrogen and helium atoms. About five billion years later the stars began to form as the gases got even cooler. As the stars began to age, some of them became supernovae explosions and provided material for planets, people and other life forms to develop.

THE BIG BANG THEORY IS NOT COMPATIBLE WITH THE BIBLE

There are some Christians who say that God used the Big Bang to create everything. However, the Big Bang Theory is not compatible with the Bible. God created the heavens and the earth not a big bang (Gen. 1:1), the earth was a watery substance not a fiery rock (Gen. 1:2), it was created in seven 24 hour days not billions of years (Gen. 1:3-2:3) and He created the earth before the stars not vice versa (Gen. 1:2)

THE GLORY OF GOD'S STORY

God Started Out with Nothing (Job 26:7)

God HandCrafted all of Creation (Ps. 8: 3; 19:1)

God Spoke all of Creation into Existence (Heb. 11:3)

God Stretched Out the Heavens Like a Curtain (Isa. 40:22)

The Constellations Demonstrate the Power of God (Job 38:31-32)

All Things Were Created for God's Pleasure (Rev. 4:11)

All the Universe Was Created to Worship God (Neh. 9:6)

LET'S REASON TOGETHER

1. Where did the kernel of mass energy come from?

2. How could all of the matter in the universe be compacted into a kernel?
3. What caused the kernel to bang?
4. How can you get stars from helium and hydrogen?
5. How can you get planets and people from stars (life does not come from chemicals)?
6. If everything came from a "Big Bang" why is there not life anywhere else?
7. According to science, matter has a natural tendency to move to disorder yet the Big Bang says matter is moving to order.
